SAFER ACCESS for an even safer WORKFORCE

Ease of Movement | Protected Safe Access

When space is an issue or at a premium, the AJAX Righthite Mobile Step Unit is the logical choice: Designed specifically for tanker loading areas its lightweight structure offers the perfect combination of structural strength, flexibility and manoeuvrability within the work place.

AJAX Righthite mobile step units are able to facilitate access to all types of tanker and high level maintenance platforms; its easily adjustable height accommodates different sized tankers on a daily basis.

At AJAX safety, reliability and value are our bywords for success: Any of the standard range of AJAX Step Units can be adapted by our team of skilled and knowledgeable engineers to suit any unique environments or bespoke dimensions required.

AJAX Righthite Step Units have an excellent reputation; mobile step units have been shipped around the world and are in operation in Europe, Africa, Asia and South America.

AJAX Righthite Mobile Step Unit:

To find out more about Righthite Mobile Step Units; please visit our website at www.ajax.eu.com or contact our AJAX technical team for help selecting the right model for your environment or to discuss your bespoke requirements.
