

**The easy way to get
more space**

**FAST, COST-EFFECTIVE INDUSTRIAL BUILDINGS
FOR HIRE OR SALE**

If you need more space **THE RIGHT DECISION** is critical to ensure uninterrupted and ongoing business success...

- Leasing off-site space might look attractive but could impact traceability of stock, customer lead times and transport costs.
- Building a more traditional structure will keep everything under one roof, but could cause lengthy delays and be a major cost commitment.
- Alternatively, you can hire or purchase an Aganto building and have additional on-site space within days – for as long as you need it and with minimal investment, disruption or risk.

Compared to off-site hiring or investing in more traditional buildings this solution wins hands down in terms of cost, speed, simplicity and functionality. As a company we are complete converts to these buildings and wouldn't recommend using any other provider than Aganto.

John Burgoyne, Senior Group Building Surveyor,
Travis Perkins

How will **YOUR BUSINESS BENEFIT** if you choose an Aganto building?

Far more durable than the word 'temporary' suggests, these buildings can expand operational capacity in days and remain in place for years, decades even, meeting the required British Standards for structural safety (BS6399).

There are many benefits that help customers achieve dramatic up-front cost savings and ongoing commercial gain:

- Buildings are transported to site and installed in days.
- No costly and time consuming ground-works.
- Use short term or instead of a permanent building.
- Minimal investment, commitment or risk.
- Hire when, where and for how long you need.
- Easily extend, modify, relocate or dismantle.

The option to choose a temporary warehouse over a permanent build made the transition to on-site warehousing quick and with reduced costs. The cost savings we achieved were also almost immediate and have allowed us to invest in other areas of our business.

Pat Atkinson,
Project Manager,
Constar International

Is a temporary building the **RIGHT CHOICE FOR YOUR BUSINESS?**

With the fragile economy long-term predictions and financial commitments are becoming too risky for many. Choosing a temporary building however is perfectly in keeping with current low-risk strategies.

- Depending on your business needs a wide range of sizes and specifications are available. 5m to 30m spans, unlimited length, 4m to 6m eave height and varying levels of insulation from open canopies to chilled storage units.
- Aganto buildings will complement most environmental strategies. The frame is engineered from aluminium which can be recycled indefinitely and the insulated wall cladding is 100% recycled and recyclable.

The temporary fire station building provided met our budgetary needs perfectly and was installed and dismantled very quickly, with minimum disruption. During the whole process Aganto were exemplary in terms of professionalism, quality, care and attention.

Mark Tribble, Project Surveyor,
Devon & Somerset Fire & Rescue Service

How will **YOUR BUSINESS BENEFIT** if you choose Aganto?

When you choose Aganto your project will be handled by one of our 3 founding Owner-Directors or specialist Account Managers who, between them, have over 60 years industry experience.

It is this enviable expertise and top-level interaction that will give you the right building to support uninterrupted and ongoing success for your business.

- The Aganto team is made up of temporary building specialists who have been hand-picked from within the industry.
- Our Site Managers have decades of industry experience gained from installing buildings around the world and are unrivalled in their expertise and safety standards.

From the word go we were extremely impressed and reassured by Aganto's level of expertise and knowledge combined with the fact that nothing was ever too much trouble.

George Smith,
Project Manager,
Eddie Stobart Group

What to do **NEXT?**

Call us today on **01635 202 979** to discuss your project in more detail and the following key areas we can manage on your behalf:

- Providing a free, no-obligation site survey and consultation.
- Visiting some example buildings in operation.
- Providing as much or as little support documentation your project dictates.
- Certificates and calculations for all structural and safety standards.
- Providing a planning service if your project needs it.
- Written commitment to our service levels.
- Regular and open communication at every stage of your building project.
- Meticulous health & safety documentation and standards.
- Ongoing ad-hoc or tailored maintenance programmes.

I have worked with Aganto on a number of projects and have no hesitation in recommending the Aganto buildings in terms of stability, durability and quality.

Jason Allen, Project Manager,
Strategic Projects Division,
Thomas Vale Construction PLC

Summary of **BENEFITS AND FEATURES**

- **Hire contracts** – for minimal commitment and investment.
- **Purchase options** – for longer-term needs with a buy back.
- **No foundations** – we can build directly onto existing hard surfaces in less than a week.
- **Aluminium frame with a ten year guarantee** – combining lightweight flexibility with quality and longevity.
- **Buildings conform to British Standards for structural integrity (BS6399)** – ensuring the required safety standards are met for UK snow and wind loadings.
- **Unlimited length in 5m bays, eave heights up to 6m and widths from 5m to 30m in 5m modules** – providing a solution for everyone.
- **Varying levels of insulated cladding ranging from canopies through to temperature controlled and chilled environments** – guaranteeing a solution for everything.
- **Buildings can be linked together or to existing structures** – creating larger spaces and covered access to and from existing facilities.
- **Fully relocatable** – meaning other company sites or locations can benefit in the same or alternative ways.
- **Recycled and recyclable materials used** – creating a lower environmental impact than other structures.
- **Evidence and experience** – visit one of our showcase buildings to see a fully operational facility or look on the Aganto website to read one of our many case studies and testimonials.
- **Specialist service and building solutions** – you tell us what you want and we will deliver exactly what you need.

ALUMINIUM FRAMED INDUSTRIAL BUILDINGS for hire or sale UK wide

CANOPY RANGE

Our canopy structures are an extremely quick and cost-effective way of protecting goods, materials and loading operations from the weather.

PROTECT RANGE

When goods, equipment or activities don't require a temperature controlled environment, the Aganto Protect is a fast, effective and economical building solution.

INSULATE RANGE

For more sensitive storage applications or operations, the Aganto Insulate will control temperature, minimise condensation, reduce structural noise and decrease heating or cooling costs.

CONSTRUCTION

Aganto buildings are transported, installed and dismantled by our own Site Managers and can be anchored down to existing hard standing without needing any ground-works – creating additional space in days.

ROOF AND WALL SYSTEMS

■ PVC Roof

■ PVC Thermo Roof

■ Steel Cladding

■ Polymer Composite Insulated Walling

■ Insulated Steel Sandwich Walling

ACCESS

■ Roller Shutter

■ Speed

■ Sliding

■ Pedestrian

■ Glazed

More wall and door options are available, please discuss with your project manager.

OPTIONAL EXTRAS INCLUDE:

- Lighting
- Windows
- Flooring
- Guttering
- Temperature control
- Power distribution

QUALITY STANDARDS

- Strong and durable industrial aluminium frame with a ten year guarantee.
- Snow and wind loadings to BS6399.
- All roof, wall and floor systems conform to British Fire & Safety Codes.

TECHNICAL FEATURES

- Installed in days by anchoring down to existing hard standing.
- Easily installed, dismantled, modified or relocated.
- Coloured roof and wall options.
- Buildings can be linked together or linked to existing structures.
- Maintenance packages available, plus 24 hour emergency call out.
- PVC and Thermo Roof provides high degree of natural light.
- Bespoke sizes available on request.

ENVIRONMENT

- Our temporary buildings have a high level of reusability and recycling properties.
- Aluminium is one of the most cost-effective materials to recycle and can be recycled indefinitely; a process that requires minimal energy and creates minimal CO₂ emissions.
- The Polymer Composite Walling is 100% recycled and recyclable.
- We are keen to play a part in protecting the environment and have a commitment to operate a green policy.
