

ONLY FROM

Switch to LWS Reflex and you'll never need another Warehouse Management System... ever

Businesses change. That's a fact. Expansion, contraction, service offering, structure, facilities. The world of logistics and warehousing evolves at a fast pace. If you are planning for the future, you have to anticipate change will be part of it.

LWS Reflex warehouse management and control software has been developed to make the latest WMS technology more widely accessible and affordable, with in-built flexibility to match your needs as you grow and develop in future years.

LWS Reflex is unlike any other warehouse management system. It has all the functionality and benefits of the very highest level enterprise systems, yet you only pay for the features you actually need right now. This means you get the most efficiently tailored system for the lowest possible investment. When your business needs additional features in the future, you won't have to invest in a replacement system, instead you have these features enabled on LWS Reflex.

UNLIMITED USERS

Unlike many other systems, LWS Reflex is not licensed per user but licensed by site. With unlimited users, there's no financial penalty for growth.

PLUS

No short term licence rental for peak periods

A solution for businesses of all sizes

Intelligent

Scalable

Flexible

Easy to Integrate

eCommerce Ready

Functionality Rich

LWS Reflex can be deployed into both manual and automated warehouses, allowing operations to immediately enjoy the benefits of its sophisticated yet simple to use functionality. The LWS Reflex customer base ranges from small independent businesses through to major blue-chip companies. No matter what your company size, we can provide a cost-effective solution.

"We chose Logistex because they bring experience in delivering a complete solution for warehouse management systems and material handling solutions. Our rapid growth plans require a robust and flexible system that can improve efficiency whilst also allowing us to scale -Logistex were a clear choice."

Business Development Director QUIZ Clothing

"Logistex have an impressive client base, but from the start we didn't feel like just another customer, we were a team, all working towards the same final goal."

CEO
TSB Supply Chain

"The team at Logistex worked from initial consultation through to final handover, to understand our business needs, current processes & the potential growth of our capabilities. The team used that insight to build a software system that supports our business & reduces time within our supplychain to fulfil customer orders. This has made a significant difference to our business.

General Manager Pioneer Foods UK

Analytex Business Intelligence Dashboard

Complementing LWS Reflex, Analytex provides full operational warehouse data on screen in graphical, easy to read detail. Its many features provide users with outstanding levels of warehouse data control and management, delivering all the information needed for continuous improvements in service and productivity.

Created by the same UK team that develops the industry leading WMS, Operations teams can use the KPI dashboards to quickly identify bottlenecks, reassign resource and check progress.

Managers can create, configure, customise and save their own reports, giving unrivalled access to trends and historical information.

And because LWS Reflex is from Logistex, it's a sure thing!

About Logistex

Logistex is a provider of warehouse solutions, including design, specification, systems, equipment, installation and on-going support. As an independent integrator we are not constrained by own product manufacturing. We can specify anyone's products anywhere in the world. When you invest in LWS Reflex, you are not only getting the most future-proof warehouse management and control system, you are getting the business support and drive from one of the world's leading teams of experts in the industry.

Request your free, no obligation demo!

To help logistics executives considering investing in new equipment to understand the options & how they can help their own businesses, our warehouse systems demonstration suite provides the ultimate hands on experience.

Fully equipped with twin HD monitors and working examples of all the latest IT technology, software and equipment, visitors can input and process real life product data to view actual performance and results. Equipment such as shelving, racking and tote bins, hand-held bar code readers, printers, receiving and despatch equipment, help to create a realistic warehouse environment for bulk handling, put-away, picking, packing and despatch - replicating a full door to door process.
